Mercury Marine Reaffirmed as Sustainability Leader, Earns 16th Consecutive “Green Master” Designation

FOND DU LAC, Wisc. - Nov. 19, 2026– Mercury Marine, a division of Brunswick Corporation (NYSE: BC), has achieved the “Green Master” status from the Sustainable Business Council (SBC) for the 16th consecutive year, reinforcing the company’s long-standing commitment to sustainability, operational excellence and responsible innovation in the marine industry.

In addition to earning Green Master status, Mercury Marine was recognized as a Top Performer in Energy Management. Top Performer recognition highlights companies that not only meet Green Masters Program certification standards but excel in specific areas of sustainability impact, setting the bar for their peers and driving innovation across the business community.

“Earning the ‘Green Master’ designation for the 16th consecutive year reflects how deeply sustainability is embedded in the way we innovate, manufacture and engage with our communities,” said John Buelow, Mercury Marine president. “Our customers count on Mercury for industry-leading reliability and performance which we deliver responsibly by reducing our environmental impact, building more resilient operations and expanding access to more sustainable experiences on the water.”

Mercury Marine is among the longest-running Green Master recipients recognized by SBC. The company continues to advance sustainability through renewable energy investments, waste-reduction initiatives, operational efficiency improvements, and product innovation. These efforts are integrated across manufacturing, product development, and employee engagement programs to support resource conservation and long-term environmental performance.

The Green Masters Program evaluates applicants on a broad set of sustainability dimensions including energy use and efficiency, water stewardship, waste management, supply-chain engagement, employee health & safety, and community outreach. Green Master designation recognizes organizations demonstrating strong environmental and sustainability performance.
